

CLAIMS:

The invention is hereby claimed as follows:

1. A gaming device having a primary game comprising:

5 a plurality of identical sets of reels, each set of reels having a plurality of reels;

a plurality of identical sets of symbols on each of said sets of reels;

a plurality of paylines associated with said sets of reels;

a display device adapted to simultaneously display said sets of reels;

10 and

a processor which communicates with said display device, which enables a player to wager on said paylines on said plurality of sets of reels, which evaluates each of said sets of reels wagered on by the player for winning combinations of said symbols and which provides payouts to the
15 player based on the combinations of symbols and the player's wager.

2. The gaming device of Claim 1, wherein said processor is adapted to enable the player to wager on predetermined combinations of said symbols to occur on at least one of said paylines in said sets of reels.

20

3. The gaming device of Claim 1, wherein said processor is adapted to enable the player to wager on a predetermined combination of said symbols to occur on a payline in at least two of said sets of reels.

4. The gaming device of Claim 1, wherein said processor is adapted to enable the player to wager on one of said symbols to occur on at least one of said paylines in each of said sets of reels.

5. The gaming device of Claim 1, wherein said processor is adapted to enable the player to wager on one or a combination of said sets of reels where a predetermined combination of said symbols will occur on a payline.

6. The gaming device of Claim 1, wherein said processor is adapted to enable the player to wager on one or a combination of said set of reels wherein a predetermined combination of said symbols will not occur on said paylines.

7. The gaming device of Claim 1, wherein said processor initiates paylines in another said set of reels when the player wagers on all of said paylines in one of said set of reels.

8. A gaming device comprising of:

a plurality of sets of reels;

a plurality of identical sets of symbols on each of said sets of reels;

a display device; and

5 a processor which communicates with said display device, wherein
said processor and said display device simultaneously display said plurality of
sets of reels, enable a player to wager on said paylines on said plurality of
sets of reels, simultaneously spins each of said sets of reels wagered on by
the player, evaluates each of said sets of reels wagered on by the player for
10 predetermined combinations of said symbols, and provide the player any
award associated with said predetermined combinations of symbols obtained
on the reels.

9. The gaming device of Claim 8, wherein said processor and
15 display device are adapted to enable the player to wager on predetermined
combinations of said symbols to occur on at least one of said paylines in said
sets of reels.

10. The gaming device of Claim 8, wherein said processor and
20 display device are adapted to enable the player to wager on a predetermined
combination of said symbols to occur on a payline in at least two of said sets
of reels.

11. The gaming device of Claim 8, wherein said processor and display device are adapted to enable the player to wager on one of said symbols to occur on at least one of said paylines in each of said sets of reels.

5 12. The gaming device of Claim 8, wherein said processor and display device are adapted to enable the player to wager on one or a combination of said sets of reels to have a predetermined combination of said symbols occur on a payline.

10 13. The gaming device of Claim 8, wherein said processor and display device are adapted to enable the player to wager on one or a combination of said set of reels where a predetermined combination of said symbols will not occur on said paylines.

15 14. The gaming device of Claim 8, wherein said processor initiates paylines in another said set of reels when the player wagers on all of said paylines in one of said set of reels.

15. A gaming device having a primary game comprising:
a plurality of sets of reels, each set of reels having a plurality of reels;
a plurality of symbols which are identical on each of said sets of reels;
a plurality of paylines associated with said sets of reels;
5 a display device adapted to simultaneously display said sets of reels;
and

a processor which controls said display device, evaluates a wager placed by a player, and places said wager on one of said paylines on one of said sets of reels, and places a subsequent wager on one of said paylines on
10 another of said set of reels if all of said paylines in said first set of reels are wagered on by the player.

16. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on individual paylines in said sets of
15 reels.

17. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on predetermined combinations of said symbols to occur on at least one of said paylines in said sets of reels.
20

18. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on a predetermined combination of said symbols to occur on a payline in at least two of said sets of reels.

19. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on one of said symbols to occur on at least one of said paylines in each of said sets of reels.

20. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on one or a combination of said sets of reels where a predetermined combination of said symbols will occur on one of said paylines.

21. The gaming device of Claim 15, wherein said processor is adapted to enable the player to wager on one or a combination of said set of reels where a predetermined combination of said symbols will not occur on said paylines.

22. A gaming device having a primary game comprising:
a plurality of sets of reels, each set of reels having a plurality of reels;
a plurality of symbols which are identical on each of said sets of reels;
a plurality of paylines associated with said set of reels;
a display device adapted to simultaneously display said set of reels;

and
a processor which controls said display device, and which enables the player to wager on at least one of the sets of reels having a winning symbol or combination of said symbols on said set of reels.

23. The gaming device of Claim 22, wherein said processor is adapted to enable the player to wager on said paylines in said sets of reels.

24. The gaming device of Claim 22, wherein said processor is adapted to enable the player to wager on predetermined combinations of said symbols to occur on at least one of said paylines in said sets of reels.

25. The gaming device of Claim 22, wherein said processor is adapted to enable the player to wager on a predetermined combination of said symbols to occur on a payline in at least two of said sets of reels.

26. The gaming device of Claim 22, wherein said processor is adapted to enable the player to wager on one of said symbols to occur on at least one of said paylines in each of said sets of reels.

27. The gaming device of Claim 22, wherein said processor initiates paylines in another said set of reels when the player wagers on all of said paylines in one of said set of reels.

28. The gaming device of Claim 22, wherein said processor is adapted to enable the player to wager on one or a combination of said set of reels where a predetermined combination of said symbols will not occur on said paylines.
